

Aqua UV-Diver Light

Information: Used in the Survey and ROV industries, this reliable and indispensable UV Black light is best known for its resilience, capable of resisting shock and vibrations often experienced during underwater exploration. It has high color temperature LEDs and is designed to control the light projected to assure you have the best visibility possible.

Manufacturer Name :
Aqua-Tech Solutions

Equipment Name:
Aqua UV-Diver Light

Specifics of Equipment:

Housing: Titanium (Delrin & Stainless Steel upon request)

Outer Diameter: 1.59 in / 4 cm

Length: 5.04 in / 12.8 cm

Weight Air: 1.08 lbs / 0.49 kg

Weight Water: 0.64 lbs / 0.29 kg

Depth: 19685 ft / 6000 meters

Per the Manufacturer:

Applications include Leak and NDT—Magnetic Particles Detection
High efficiency LEDs—produce over four times more usable light per watt than halogen lamps.

Also available in Halogen

Compact size, rugged design, and light weight

Easily mounted on helmet or mask

Suited for ROV applications

Optional Accessories :

- Connector
- Whips Mi-Glow®
- Magnetic Particle

Accompanying Accessories:

Ask sales representative for further details and cost.
