

Power Packs & Hose Reels

Information:

Used primarily for the Diving and ROV industries, the Air Driven Torque Wrench Pump provides reliable connections and performs with consistent reliable power withstanding the demands of any environment.

Manufacturer Name :

Enerpac

Equipment Name:

ZA4T Air Driven Torque Wrench Pump / 10K Hydraulic Pump

Specific Details of Equipment:

Reserve Capacity: 1 and 1.75 gallons / 3.79 and 6.62 liters
Flow @ 10,000 psi: 60 in³/min / 983.22cm³/min
Max. Operating Pressure: 10,000 and 11,600 psi

Per the Manufacturer:

- * Z-Class high-efficiency pump design; higher oil flow and bypass pressure
- * Two-speed operation and high by-pass pressure reduces cycle time for improved productivity
- * Heat exchanger warms exhaust air to prevent freezing and cools the oil
- * Ergonomic pendant allows remote operation up to 20 feet / 6.1 meters
- * Glycerin filled pressure gauge with transparent overlays in Ft.lbs and Nm for Enerpac torque wrenches provide a quick torque reference
- * Regulator-Filter-Lubricator with removable bowls and auto drain is standard
- * Valve technology reduces oil operating temperatures and withstands contaminants to increase pump reliability
- * Applications: best suited for power medium to large size wrenches
- * The ZA series provides greater speed, ease of use, and reliability in the toughest environment.

Optional Accessories :

Ask sales representative for further details and cost.

- Torque Tools
- Nut Splitters
- Flange Spreaders
- Wire Rope Cutters

Accompanying Accessories:

300-600 ft Hydraulic 10K Twin Line Hose Reel
