## Tuggers & Winches

**Information:**

Used primarily for the Construction and Maintenance industries, this Air Tugger is lever operated with a relined band brake. It is designed for utility use and has been a staple tool in hoisting mine timbers, drill steel, drills and many other heavy items.

**Manufacturer Name :**

Ingersoll Rand

**Equipment Name:**

4K Tugger

**Specifics of Equipment:**

Optimal Capacity: 4000 lbs lifting capacity / 1814.4 kg  
Line Speed: 125 fpm  
Weight (shipping): 850 lbs / 385.55 kg

Per the Manufacturer:

- \* Radial Piston Motor  
Provides positive starting with precise load control.
- \* Built to Last  
All pinion shafts are splined for maximum power transmission and longevity. Ball and roller bearings reduce friction, increase efficiency.
- \* Enclosed Construction  
Keeps out dirt and dust and seals in oil and grease for complete lubrication of all moving parts.
- \* Disengaging clutch  
Allows the drum to free-wheel for easy unwinding of the wire rope. Not available with auto brakes.

**Optional Accessories :**
