ROV Tools Dredging and Jetting

Information:

Used in the ROV industry, the Trash Pump is a light weight, heavy duty pump capable of pumping high volumes of water, sand slurries, gravel, sludge and solids of up to 4 in in diameter. Its used for light dredging tasks, clearing pipe line crossings, drill cuttings, and partially buried subsea hardware or equipment.

Manufacturer Name :

Stanley

Equipment Name:

T03 Submersible Trash Pump

Specifics of Equipment:

| | |
|--------------------------|---------------------------------------|
| Housing: | Urethane Impeller & Urethane Bowl |
| Length: | 14 in / 35.5 cm |
| Width : | 12 in / 30.4 cm |
| Weight: | 31 lbs / 14 kg |
| <i>Hydraulic Motor -</i> | |
| Pressure: | 2000 psi / 140 bar |
| Input flow: | 7-9 gpm / 26-34 lpm (operating range) |
| Connection Type: | 1/2 JIC Supply and Return |
| <i>Pump -</i> | |
| Output flow: | 450 gpm / 1688 lpm |
| Output: | 25-30 psi head pressure |

Optional Accessories :

Ask sales representative for further details and cost.

Per the Manufacturer:

- * Submersible (no priming required)
- * Able to run dry without damage
- * Lifting eye and carrying handle
- * 3 in NPT Female discharge
- * Wingnuts for easy bowl removal and cleaning

Accompanying Accessories:

- Coupler, 3 in Male NPT/3 in. Male Camlock
- Mounting Plate
- Suction Nozzle
- Suction Hoses
- Hydraulic Hoses
- Diffuser
- Certified Transportation Box
