

Grit Sandblasting Pot

Information:

Add flexibility to your blasting operation. These multi-media units can be used with a wider range of abrasive media than standard blasters, including sodium bicarbonate, aluminum oxide, plastic, glass beads, crushed glass and even steel grit.

Manufacturer Name :

Schmidt

Equipment Name:

Grit Sandblasting Pot

Specifics of Equipment:

MAWP 300 PSI AT 260 DEGREES F

MDMT -20 DEGREES F AT 300 PSI

Per the Manufacturer:

- Low overall height for easier filling and handling
- An abrasive shutoff valve allows removal of the TVII without emptying abrasive from the vessel
- Electric controls available
- Remote abrasive cutoff option available for conveniently blasting air without abrasive (such as cleanup)
- Integrated load skid Inlet
- Blast pressure and tank pressure regulators for precise blast control
- Ball valve with quick-detach clamps for easy removal of the Thompson Valve II
- Easy-to-use media shut-off valve
- Internal grit suppression valve to reduce media backflow into controls
