

AquaTech Solutions

TX-8

Information:

The TX series is the "go-to" wrench when standard industrial torque tools are limited by size in their ability to engage the fastener. The TX eliminates issues around the nut, behind the nut and above the nut. On applications with extended stud protrusion, the TX easily slips over to get the torque applied with an accuracy of +/-3%.

Manufacturer Name :

TorqUp

Equipment Name:

TX-8 Drive Cylinder with interchangeable hex links

Specifics of Equipment:

Minimum Torque: 830 Ft/lbs

Maximum Torque: 8630 Ft/lbs

Output Accuracy: +/- 3%

Cylinder Weight: 6.0 Lbs, 2.7 Kg

Hex Range From: 1-7/8"

Hex Range To: 4-5/8"

Optional Accessories :

- 10K Twin-line hose
- 10K Torque Pump

Accompanying Accessories:

Ask sales representative for further details and cost.
