

Aqua-Cavi Internal Hose Reel & Control Panel

Information: Used primarily for the Diving industry, this device will remove growth safely with the cavitation technology. This underwater pressure washer is designed, fabricated and assembled to be offshore and comply with current GOM requirements.

Manufacturer Name :
Aqua-Tech Solutions

Equipment Name:
Aqua-Cavi Internal Hose Reel & Control Panel

Specifics of Equipment:

Engine: Kubota
Dimensions: 64" H x 55" W x 62" L
Weight: 2400 lbs.

Per the manufacturer:

- Easy to use
- Fresh water or sea water
- Increased safety
- All types of marine growth from seaweed to hard, well attached barnacles are easily removed with only one pass, saving operators time and money
- Effective on all types of surfaces including steel, concrete, wood, plastics, rubber and fiberglass.
- Surfaces can be cleaned without disturbing paint, varnish, or anti-fouling coatings and releasing heavy metals or other contaminants into the water when using low pressure.
- The cavitation flame leaves a smooth surface that retards biological growth and decreases cleaning frequency.
- The pistol grip nozzle system is compact, enabling complex geometrical surfaces to be easily cleaned.

Optional Accessories :

N/A
